

Structure of the Computing Curriculum

The B. Sc. Health Computing program (B.Sc.HC) requires four years (8 semesters) divided into three phases: all are based at the main campus of the College with one or two days off campus in visits to relevant institutions and training facilities. The program schedule therefore involves considerable commitment from students to be on time at the respective sites specified in their daily timetables. Each student should have a functioning e-mail address for last moment changes, a frequent incident in field training programs.

Phase 1: Introductory courses and College requirements

Semesters 1

Phase 2: Health computing sciences

Semesters 2-4

Phase 3: Practical training

Semesters 5-8

*DETAILS OF COMPUTING COURSES ARE UNDER CONSTRUCTION
ACCORDING TO TO REQUIREMENTS AND PROCEDURES OF THE
COMMITTEE OF HIGHER EDUCATION, IT WILL BE PUBLISHED SOON.*
